

Dear Hiring Manager,

I am eager to bring my expertise in AWS cloud implementation, Infrastructure as Code (IaC), and DevOps best practices to the Platform Engineer role at ITV. With a strong background in designing scalable, secure cloud solutions and a hands-on approach to automation, I am excited by the opportunity to contribute to the Common Platform team and support software development across ITV.

In my current role as a Solutions Architect for the Lagos State Government, I have implemented hybrid cloud infrastructures, optimised load management with AWS Auto Scaling and Elastic Load Balancing, and developed disaster recovery strategies using AWS Backup and CloudFront. My experience with Terraform, Kubernetes, and CI/CD pipelines, combined with my ability to diagnose and resolve production issues, aligns well with the core responsibilities of this role. Additionally, my tenure as CTO at Alisia.ai allowed me to architect AI-driven cloud platforms while leading agile teams, further strengthening my technical and leadership capabilities.

Beyond technical proficiency, I excel in stakeholder management and cross-functional collaboration. I have worked closely with engineering teams to implement best practices, conduct training workshops, and support DevOps adoption—skills that will be invaluable in ensuring seamless communication of platform changes across ITV's software teams. I am also keen to leverage my knowledge of cloud cost optimisation and resilience strategies to enhance the efficiency of ITV's infrastructure.

What excites me most about this opportunity is ITV's commitment to innovation and the chance to work on a platform that impacts millions. As a company at the forefront of the digital streaming revolution, ITV presents an ideal environment where I can apply my cloud expertise to drive operational efficiency while continuing to grow as an engineer. I would welcome the opportunity to discuss how my skills can contribute to ITV's Common Platform team.

Thank you for your time and consideration. I look forward to the possibility of joining ITV and helping shape its digital future.

**Best regards,**

**David Zorto**
